Art Unit: 1793

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-11, 13 and 24-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original specification for the step of "adding an additive, wherein said additive is one selected from a group consisting of a polymer, a nitrogen source, an alcohol, a Hoagland's solution, and a mixture thereof" (as opposed to all of a nitrogen source, an alcohol, and a Hoagland's solution). (See Paragraphs [0024] and [0027] of the original specification.) Also, there is no "description support" in the original specification for employing a polymer as an additive in the absence of the nitrogen source, alcohol, and Hoagland's solution, since Paragraph [0025] of the original specification discloses that the plant nutrition "further" includes a polymer. That is, the polymer would be in addition to the nitrogen source, alcohol and Hoagland's solution.

Claims 1, 3-11, 13 and 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is indefinite as to whether the

steps of “filtrating said biopulp for preparing a filtrate”, “formulating said filtrate for preparing said plant nutrition”, and “fermenting said culture solution for preparing said biopulp” would require that a filtrate, plant nutrition and biopulp, respectively, actually be prepared, or whether a filtrate, plant nutrition or biopulp is merely an intended use of the biopulp, filtrate or culture solution, respectively, but would not actually have to be prepared. The phrase “for preparing” should be changed to - - so as to prepare - - to avoid this rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
